

IT ASSET MANAGEMENT: Hard Drive Services

Revised
11/21

DATA PROTECTION

The data on discarded hard drives contains private information such as passwords, financial details, contacts and more. When these fall into the wrong hands, you could face a data breach or organizational crisis.

While there are many different services available for disposing of hard drives, there are two main pathways of service offered by NLR. Both services are compliant and follow best practices to make sure your data is kept safe and secure.

RECYCLING/ REFURBISHMENT

Ideal for applications where sensitive data is NOT stored on drives and drives are operational

- ✓ Utilizes R2/RIOS certified vendors
- ✓ Drives are written over and wiped clean to DoD (Department of Defense) Standards.
- ✓ Drives can then be safely reused without risk of old data being recovered
- ✓ Certificate of Recycling provided.

SECURE DATA DESTRUCTION

Ideal for applications where sensitive information is stored on drives

- ✓ Utilizes NAID/ R2 certified vendors
- ✓ Drives are shredded down to less than an inch in size.
- ✓ Lock Box Service available
- ✓ Certificate of Destruction Provided
